

IP Stack

Provides:

The Ip address of the user and the longitude/latitude associated with them as well as the zipcode/city/country of that area

Key Provisioning:

Pain factor (0=ezipz...5=nightmare): 

- Register with name/address/email address, and you'll get an API key

Quotas:

- No quotas

The Good:

- Super easy to get the info
- More accurate than some other Ip Geolocators
- Provides user IP
- Provides user zip code and longitude and latitude
- Three options for getting ip info:
 - Get user IP info
 - Get specific IP info
 - Get info for multiple specific IPs

The Bad:

- Can't be used with alternative IP address
- Not 100% accurate on location

The Ugly:

- ...

Location: <https://ipstack.com/>

Get User IP + Info: http://api.ipstack.com/check?access_key=YOUR_API_KEY_HERE

Get IP Info: http://api.ipstack.com/<IP_ADDR>?access_key=YOUR_API_KEY_HERE

Accurate as of (last update): 2019-11-24
