Collected Knowledge & Wisdom on

CanvasJS Graphing API

Provides:

This API provides a way to generate graphs through a HTML script tag. Allows the user to create many types of graphs like bar charts or scattergrams. Requires numerical data and independent and dependent variables.

Key Provisioning: **Pain factor** (*0=ezpz...5=nightmare*): __0__

- No need for a key

Quotas:

- None

The Good:

- Not a traditional API, but it requires a script tag in the HTML file to be able to create a graph or scattergram

The Bad:

- ...

The Ugly:

- ...
